

Soumyadeep Mondal

Data Analyst, Accenture

Pune, Maharashtra | +91 7044507912 | soumyadeepmondal028@gmail.com | [GitHub](#) | [LinkedIn](#)

Summary

Data Analyst with 2+ years of experience in business reporting, KPI tracking, and dashboard development, delivering actionable insights to stakeholders. Skilled in **Power BI, SQL, Automation** and **ETL** processes, with a strong focus on data visualization and reporting automation to improve efficiency and data quality. Experienced in stakeholder management, ad-hoc analysis, and data storytelling within enterprise environments. Exposure to financial and regulatory reporting, with emphasis on governance, controls, and audit readiness. Holds a **B.Tech in Information Technology**.

Technical Proficiency

- Language/Software:** Python, SQL, Power BI, Tableau, PowerApps, Power Automate, Excel
- Packages/Framework:** Numpy, Pandas, Matplotlib, Scikit-learn, Streamlit

Knowledge and Skills

- Modelling Technique:** Logistic Regression, Linear Regression, Decision Trees, Random Forest
- Analytical Capabilities:** Descriptive analysis, Data wrangling, Data visualization, Root cause analysis
- Industry Knowledge:** Banking Analytics, Risk and Regulatory Reporting

Work Experience

Accenture

Nov'25 - Present

Data Analyst

- Developed **Power BI dashboards for KPI tracking, business reporting, and performance monitoring**, enabling senior stakeholders to drive data-informed decisions and generate actionable business insights across 500+ critical applications.
- Designed and implemented **automated ETL and reporting pipelines** using SQL, Power Automate, and PowerApps, improving reporting efficiency by 60% while enhancing data accuracy and timeliness.
- Built **scalable data models and DAX measures** to support resiliency scoring and regulatory reporting, ensuring alignment with governance, audit requirements, and data quality standards.

Accenture

Feb'24 - Oct'25

System Engineer

- Led **Application Impact Analysis for 300+ enterprise applications**, defining resiliency tiers and business criticality mapping used for disaster recovery planning.
- Created **interactive Power BI dashboards** for Cyber Resiliency and Disaster Recovery metrics, improving stakeholder visibility and reducing audit preparation time by 40%.
- Automated **data collection and reporting workflows** using Power Automate and chatbot integrations, improving process efficiency and strengthening reporting controls.

Domain-Focused Technical Projects

- Bank Transaction Fraud Detection:** Built an end-to-end **data pipeline for transaction monitoring and anomaly detection**, leveraging Python and Airflow for automated data ingestion and transformation. Implemented **rule-based validation and anomaly detection logic** to support fraud identification and risk flagging. Designed a **Streamlit dashboard for transaction monitoring, trend analysis, and reporting insights**, enabling proactive risk assessment. Deployed solution on AWS, simulating a **scalable, cloud-based reporting and monitoring environment**.
- Regulatory Reporting Simulator (FR Y-9C & Capital Adequacy Dashboard):** Developed a **regulatory reporting framework** simulating FR Y-9C processes, focusing on data validation, reconciliation, and reporting controls. Automated **capital adequacy calculations and risk-weighted asset analysis** using SQL and Python. Built a **Power BI dashboard for regulatory reporting, KPI tracking, and exception monitoring**, improving transparency and audit readiness. Ensured alignment with **governance standards, reporting controls, and compliance requirements**.
- Stock Market Sentiment Analysis:** Built a **LSTM-based predictive model in Jupyter Notebook** to analyze sentiment from financial news articles and forecast potential stock price trends. Applied **Natural Language Processing (NLP)** to extract sentiment polarity and used time-series modelling to simulate market behaviour. Deployed visual outputs and interactive insights using a **Streamlit** app to showcase trends and model predictions.

Education

Guru Nanak Institute of Technology

2019 - 2023

B.Tech in Information Technology | CGPA: 8.71

Certifications & Specialized Courses

- Microsoft Certified: Power BI Data Analyst Associate **(PL-300)**
- Microsoft Certified: Azure Data Scientist Associate **(DP-100)**
- Microsoft Certified: Azure AI Engineer Associate **(AI-100)**
- Microsoft Excel - Excel from Beginner to Advanced | Udemy
- SQL - MySQL for Data Analytics and Business Intelligence | Udemy
- Applied Machine Learning in Python | Coursera
- Data Science in Python | Coursera
